

# Maximize the Value of Your ERP Investment

## Are You Ahead Of The Curve?

Your investment in ERP as the heart of your company has the power to transform your business and achieve sustainable, measurable improvements. However, industry surveys show that nearly 50% of ERP implementations do not meet the original project outcomes, ROI expectations, and business goals. Fortunately, there are ways to overcome these issues by discovering the root causes of ERP implementation deficiencies, identifying opportunities, and creating an ERP Optimization Plan for success.

## Are you using ERP Best Practices?

As your business grows and evolves, new opportunities for value creation can be realized. From our experience with our ERP clients, Turning Point understands how to identify these opportunities and achieve ongoing value through the implementation of TPC Complete™ for ERP best practices.

### TPC Complete for ERP Optimization Assessment Focus Areas

- *Business Strategy*
- *Operating Model*

*Turning Point does not sell software. Our only goal is to ensure you get the most from your ERP investment.*

## Use the ERP Optimize Assessment Report To Realize Value

After reviewing the results of the Assessment, you will understand your baseline and have a prioritized action plan. The Turning Point team will work with you to identify your next steps roadmap, timeline, potential project investments, and estimate financial, productivity, customer satisfaction, and employee engagement returns.
